

Drone Services for the Global Insurance Industry

Tap into globally-accessible drone capabilities backed by the trusted name in insurance risk mitigation to finally realize the insights, safety, and efficiency of a fully-operational drone services program.

Powerful Insights

Gain unprecedented insight into risk locations pre- and post-loss for more informed underwriting and claims decisions.

Enhanced Safety

Support your adjusting team by providing greater insight into risk locations that are otherwise difficult to access.

Greater Efficiency

Improve data acquisition using state of the art aerial video and photography.

Our Approach

1 Capture

Leading-edge technologies allow us to capture, process, and deliver images within hours.

2 Process

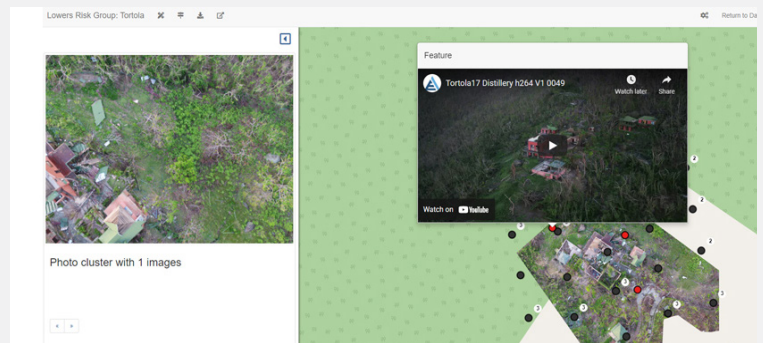

All data is delivered to you via a secure web portal. Simply log in and start working with the detailed datasets to uncover the information you need.

3 Model

Processed orthomosaic images can be overlaid where the claim is situated and additional markers for 360 images or videos can be placed on additional layers.

4 Measure

Measurements can be taken in 2D space on orthomosaic image layers as well as in 3D space using Point Clouds.

Services

- Inspections
- Surveys
- 3D Mapping
- LiDAR

Use Cases

- Inform underwriting decisions.
- Assess damages for claims adjustments.
- Gain insights to evaluate risk.
